

SmartFilter v4.0 ▶

Secure Computing announced the release of SmartFilter v4.0, a major upgrade of the company's SmartFilter web filtering solution. Significant enhancements to SmartFilter v4.0 include expansion of the URL database to over six million sites, additional categories that address the latest security threats, and a revolutionary Web-based reporting feature offering real-time feedback on an organization's Web usage. www.securecomputing.com

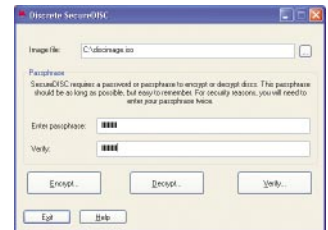

◀ RemoteScope

RemoteScope is a simple, inexpensive remote desktop management suite from Micro 2000 Inc. It functions on any Windows-based PCs, from 95B through XP, 2000 and the latest server versions. The intuitive interface provides access to a powerful set of tools for deployment of patches and applications, automated task management, remote control or monitoring, secure messaging or conferencing, and a host of other features to simplify management of LANs or WANs — all from the administrator's desktop. www.micro2000.com

SecureDISC ▶

Discrete Technologies announced the latest addition to its suite of disc productivity tools: SecureDISC. Used in conjunction with any CD/DVD recorder, SecureDISC encrypts data as it is being written to the media, thus protecting sensitive data in the event the disc is lost or stolen. SecureDISC allows organizations to take advantage of the high capacity and standardization of CD-ROMs and DVD-R, while controlling access to sensitive, confidential, proprietary or classified data stored on disc. The core of the system is a powerful administrator program that utilizes AES encryption to encrypt images and issue user decryption keys. www.discretetech.com

StealthWatch ▶

Lancope, a provider of behavior-based network integrity solutions, announced Version 4.1 of StealthWatch and StealthWatch Management Console. Using Network Baselining Anomaly Detection, the StealthWatch system reveals and resolves unnecessary network exposures before they become problems. Excelling in the rapid detection, investigation and containment of worms, internal misuse and other network anomalies, StealthWatch 4.1 delivers improved network defense and enhanced visibility. www.lancope.com
